ENGLISH VERSION

1761 MATCH WALNUT – CALIBER .22 l.r.

PERFECT FOR BEGINNERS AND ADVANCED LEVELS

The new single loader 1761 Match Walnut small bore target rifle is based on our high precision 1761 barreled action and has been adapted to the requirements of target shooters. The advantage of this small bore barreled action is a very short and compact action that allows fast and ergonomic reloading, along with three locking lugs which lock the self-centering bolt. The foundation of the outstanding precision is based on the high degree of rigidity, the flat supporting surface of the barreled action, and an integrated recoil lug, paired with a heavy 647 mm ANSCHÜTZ precision target barrel. Thanks to the elegant walnut stock with a height-adjustable walnut cheek piece and an adjustable butt plate carrier with rubber butt plate, this rifle accommodates every shooting position. The interface between shooter and target rifle, the 5061 M match trigger, has an adjustable range of 60 - 490 g and is factory-set to 125 g. This 5061 M match trigger leaves nothing to be desired.

Perfect for beginners and advanced levels.

Cheek piece horizontal 3-way adjustable, with integrated thread for assembling a weight carrier.

The fore-end is equipped with an aluminum prism rail, for mounting a hand stop.

Your Dealer

„ANSCHÜTZ researches and produces at high-tech level. We draw on a source of traditional craftsmanship which has never become old-fashioned.

This is a tradition which ultimately means consistency and perseverance and not letting ourselves be seduced by short-lived trends, even if they may be tempting.

We therefore see ourselves as the guardians of excellence ‚Made in Germany‘. We manufacture almost all the components of our rifles ourselves.

The pride of our employees in ‚their‘ company is based on the knowledge of their extraordinary responsibility – in the same way as the ANSCHÜTZ company is proud of its employees!“

ANSCHÜTZ rifles are not just simple production firearms. They are individual masterpieces that are designed, assembled and tested with the utmost attention to detail.
