LASER POWER

**BOOST THE SHOOTERS**

## LASER POWER

### **STRONG ARGUMENTS**

#### **Easy access – maximum support:**

Shooting with ANSCHÜTZ Laser Power rifles provides a comprehensive training in the areas of stamina, concentration, strength and reaction, coordination, and speed from the very beginning!

Even eight-year-olds can practice shooting thanks to the light-weight Laser Power rifle. A modern and fascinating aura surrounds light shooting thanks to the high-tech component. The first training accomplishments are achieved immediately due in part to the easy handling.

Shooting with the ANSCHÜTZ Laser Power rifles is absolutely safe and is not subject to the restrictions of gun control laws. This enables the safe introduction to the sport of shooting from an early age.

**Shooting with “light” has strong arguments on its side!**

# LASER POWER

## **SUPPORTS SHOOTERS IN...**

### **I STAMINA**

Stamina is not only about fitness – stamina also means keeping your skill level constant, even over a lengthy period, and being able to focus your mind and body on the target, on success.

Laser Power shooting promotes stamina.

### **II STRENGTH**

Although Laser Power rifles are relatively light in weight, shooting requires a certain amount of muscular strength to take part in a competition and complete a sequence of 20 shots.

Laser Power shooting trains the muscles.

### **III REACTION**

Reaction is closely connected with the action. The decision to fire the shot must be made within a fraction of a second, after and when the sights are on the target.

Laser Power shooting trains the ability to recognize the right moment, as well as teaching the correct reaction.

### **IV COORDINATION**

Coordination takes patience. Laser Power shooting shows its full complexity when broken down into its component parts: Standing still, posture, breathing, and focusing on the target. The shot may not be taken until all the components are in harmony.

Laser Power shooting trains patience and coordination.

### **V POSTURE**

In order to fire precise shots, you need a good position of the rifle in your shoulder. In addition its very important to have a good stand of your feet. Your body should not shiver while you aim with your Laser Power rifle on the target box.

LaserPower shooting trains you to find a right and solid posture.

### **VI CONCENTRATION**

Laser Power shooting is a ritual which promotes mental concentration. If you train your mind, you will become more focused and reduce stress.

Laser Power shooting helps you to concentrate and focus.

## LASER POWER SHOOTING **FOR LEISURE AND EVENTS**

**It's simple with the ANSCHÜTZ Laser Power models.**

If you are looking for an attraction for your private party or event, delight your guests with the Laser Power models from ANSCHÜTZ.

Various Laser Power models and packages are available to buy which guarantee plenty of fun and excitement at your event.

## LASER POWER RIFLE **PROFI LEVEL - SET**

ANSCHÜTZ offers the perfect entry-level model for Laser Power shooting in the form of the Profi Level - Set. Easy to handle and equipped with a sturdy hardwood stock which is suitable for right- and left-handers. The precise sight set with a rear sight and a front sight supports a successful "shot" at the supplied target box, including a target reducer and remote control.

### **DELIVERY VOLUME**

Laser Power IV rifle incl. 2 AAA batteries, Laser Power rear sight, front sight M18, rear sight riser block, rubber butt plate, spacer, target box incl. 2 AA batteries, 5V power adapter, IR remote control, target reducer, tool set, and instruction leaflet.

## LASER POWER RIFLE MASTER LEVEL - SET

**ANSCHÜTZ**

EINFACH EINS WERDEN!

Virtually identical to the 1827 F from ANSCHÜTZ, the most successful biathlon rifle in the world, but one third lighter! The sturdy walnut stock has an adjustable butt plate and cheek-piece for individual adjustment to your height. The precision rear sight has an anti-glare tube, and swivel rails for the harness and sling are also provided. So nothing stands in the way of emulating your biathlon idols.

### DELIVERY VOLUME

Laser Power IV biathlon rifle incl. 2 AAA batteries, rear sight 6805, front sight M18, sight riser block, biathlon butt plate, biathlon cheek-piece, target box incl. 2 AA batteries, 5V power adapter, IR remote control, target reducer, tool set, and instruction leaflet.

LASER POWER

**GETTING STARTED IN TARGET SHOOTING**

## LASER POWER SHOOTING TARGET SHOOTING COMPETITIONS

### **Speed, coordination, skill and concentration**

This form of target shooting mainly serves to promote the creativity and play instinct of children aged from 6 to 11 years. In addition to a 20 shot program with the Laser Power rifle, children can also demonstrate their ability in the areas of speed, coordination, skill, and concentration.

The goal of this competition is to introduce children to competitive shooting through play and also respond to the urge to be active at this age. The German Junior Laser Power Shooting Championships are organized by the German Junior Shooters' Association.

In order to participate in these competitions, the children do not need any special clothes or other equipment. All they need is a Laser Power rifle. This enables many children to take part in such competitions easily.

Our Laser Power rifles have enabled ANSCHÜTZ to make its international experience in professional sport accessible to everyone.

# LASER POWER ALUMINUM

The Laser Power rifle with the familiar and time-tested aluminum stock from the ANSCHÜTZ air rifle line offers extensive options for adjusting the stock to the needs of the shooter. All components with direct body contact are made of high-quality walnut. The fore-end riser block 4844 can be swiveled and its height infinitely varied. The grip can also be rotated and the length changed. Furthermore, the cheek-piece and butt plate can be individually adjusted to the shooter in various ways.

**Model with precision rear sight 6805**  
Available as an accessory at extra cost.

- 1 Multi-adjustable aluminum butt plate
- 2 The cheek-piece can be swiveled and its height infinitely varied
- 3 Laser Power precision rear sight
- 4 Laser barrel, inherently safe, Laser class 1
- 5 Front sight M18
- 6 Butt plate carrier COMFORT for adjusting the stock length

- 7 High-strength aluminum stock
- 8 Oiled walnut grip with scalloped inner side
- 9 Multi-adjustable fore-end riser block 4844
- 10 SOFT-Grip coating
- 11 Laser Power precision trigger
- 12 Aluminum grooved rail in the fore-end for mounting accessories

The laser shot encoding in the Laser Power IV rifle can be changed from the preset STANDARD encoding to the ANSCHÜTZ encoding via a DIP switch on the rifle circuit board. This means that the ANSCHÜTZ Laser Power models can be fired at ANSCHÜTZ target boxes and many other target boxes of various manufacturers.

## LASER POWER **BLACK AIR**

The Black Air stock is provided with the ANSCHÜTZ SOFT-Grip coating and combines the outstanding vibration-damping and recoil-absorbing characteristics of a naturally grown wooden stock with the easy-care, non-slip characteristics of a synthetic stock.

## LASER POWER CLUB AND JUNIOR

The visually appealing laminated wood stock is suitable for both left- and right-handers. The height-adjustable cheek-piece can be adapted to your height. This stock is also available with the rubber butt plate 4758 which provides excellent grip at the shoulder. The fore-end is provided with an aluminum grooved rail which allows a hand stop or other accessories to be attached.

- 1 Multi-adjustable aluminum butt plate
- 2 The cheek-piece can be swiveled and its height infinitely varied
- 3 Laser Power precision rear sight
- 4 Laser barrel, inherently safe, Laser class 1
- 5 Front sight M 18
- 6 Butt plate carrier COMFORT for adjusting the stock length

- 7 Ergonomic laminated wood stock
- 8 Aluminum grooved rail in the fore-end for mounting accessories
- 9 Multi-adjustable rubber butt plate
- 10 Stippled checkering
- 11 Laser Power precision trigger
- 12 Benchrest rail offers space for weights and can be swiveled by 7°

The laser shot encoding in the Laser Power IV rifle can be changed from the preset STANDARD encoding to the ANSCHÜTZ encoding via a DIP switch on the rifle circuit board. This means that the ANSCHÜTZ Laser Power models can be fired at ANSCHÜTZ target boxes and many other target boxes of various manufacturers.

## LASER POWER **BENCHREST START**

The ANSCHÜTZ Laser Power rifle with the classic benchrest stock for beginners. Anatomically perfect form, made of beautifully shaped walnut. Suitable for right- and left-handed shooters, with a height-adjustable cheek-piece. The fore-end can be swiveled by 7° and provides 2-point-contact.

LASER POWER

**NOT A RIFLE FOR THE PURPOSES OF THE GERMAN GUN CONTROL LAW**

## INFORMATION ON THE PROVISIONS OF THE GERMAN GUN CONTROL LAW

"Only persons aged 18 and over are allowed to use firearms."

Section 2 of the WaGG (German gun control law). Laser Power rifles are not firearms in structural terms. They are designed in such a way that they are not considered to be firearms. The laser beam used (Laser class I) is absolutely safe. They are sports equipment and may be used regardless of age and location.

Nevertheless, Laser Power rifles resemble real firearms; this makes them so-called "imitation firearms" - they look like real rifle. Section 42 of the WaGG states the following:

"Carrying imitation firearms is prohibited." This does not apply to "transport in a sealed container".

So when you practice the sport of light shooting, you must handle your sporting equipment exactly as if you were carrying a real gun: The Laser Power rifle must be secured in a locked container during transport. Use outside the shooting range, your home or your property (which must also be "enclosed") is prohibited.

More excerpts from the gun control law: "Such objects whose general appearance indicate that they are intended for play ... or ...firearms for which a permit to carry is required are exempt from this.

In particular, objects that are intended for play ... are objects which ... contain neon-colored materials or have no marks of identification of firearms."

**Laser Power rifles are generally permitted in child and youth work on account of the playful nature of the training and also competition. The focus is on the transfer of sports skills.**

Your Dealer

“ANSCHÜTZ researches and produces on a high level of technology. In our creations, we draw on the never outdated source of traditional craftsmanship.

In the end, tradition means consistency and steadfastness, not losing your head when it comes to the multitude of perhaps tempting but short-lived trends. And so, we see ourselves as the guardians of an excellent “Made in Germany” concept:

We manufacture nearly all the components of our rifles by ourselves. The employees of ANSCHÜTZ are aware of the responsibility bound up in each individual step of production and are proud to bring with them their experience and specialist knowledge. This is the foundation of the first-class quality of ANSCHÜTZ!

ANSCHÜTZ rifles are not just simple production firearms. They are individual masterpieces that are designed, assembled and tested with the utmost attention to detail.”

**Jochen Anschütz**

President
