

ANSCHÜTZ

1727 APR COMPETITION & 1727 APR - THE NEW FEATURE PACKED FACTORY DIVISION READY PRS RACE GUNS

Single-screw adjustable floating cheek piece.

We offer different options as thumb paddle, but we highly recommend the AGP.

1727 APR competition

M18x1 barrel thread (SAKO pattern-approved).

All controls remain in the same position, even when the LOP is adjusted.

The buttstock is lightweight, stiff, and generously skeletonized for optimal balance.

Optional 60 mm adjustable Bag Rider with quick adjustment and tool-free mounting.

Our forend-to-stock interface is one of the most stable in the industry, which makes us happy. Therefore, the Icon is also amazed.

No need for extra stock wings to perfectly index your thumb.

COMPETITION QPQ-threaded forend with ARCA-Swiss Rail at 6 o'clock.

1727 APR

Hexagons are known for being one of the most structurally stable shapes — so why not use them for design purposes?

Knowing — not believing — that your mags are fully loaded is an essential advantage of the new 1727 APR magazines.

The grip is moveable lengthwise for approximately 10 mm.

Adjust your magazine depending on your ammunition or personal preferences.

The 1727 APR version comes with the PRECISION aluminum forend, featuring M-LOCK slots at 3, 6, and 9 o'clock, and an ARCA-Swiss rail at 6 o'clock.

These little fellows are packed in the new tough gun case, TAC Rugged HD, for optimal protection and easy handling of your precious items. It comes equipped with two handles, wheels, and a foam insert.
